ITEM 637.0902M	ENGINEER'S OFFICE-TYPE E

The requirements of NYSDOT Standard Specifications, Section 637 Engineer's Office and Laboratory Building, latest revision, and Applicable Addendums shall apply with the following modifications.

MATERIALS:

Signs/Bulletin Board:

The sign detailed below shall be installed at the location or locations directed by the Engineer. The panel material may be of any material permitted under the Construction Signs section. If erected at a location where the sign might be struck by passing traffic, as determined by the Engineer, the sign support shall be a breakaway type. Payment for the sign and its supports shall be included in the price bid for the Engineer's Office.

The sign shall be 1.2m W x 0.9m H with the 0.15m (larger) and 0.05m (smaller) lettering. The lettering shall be white on green background and there shall be a minimum of 0.10m space between lines and words and to the top and bottom of the sign.
